

Membuat desain menu backend

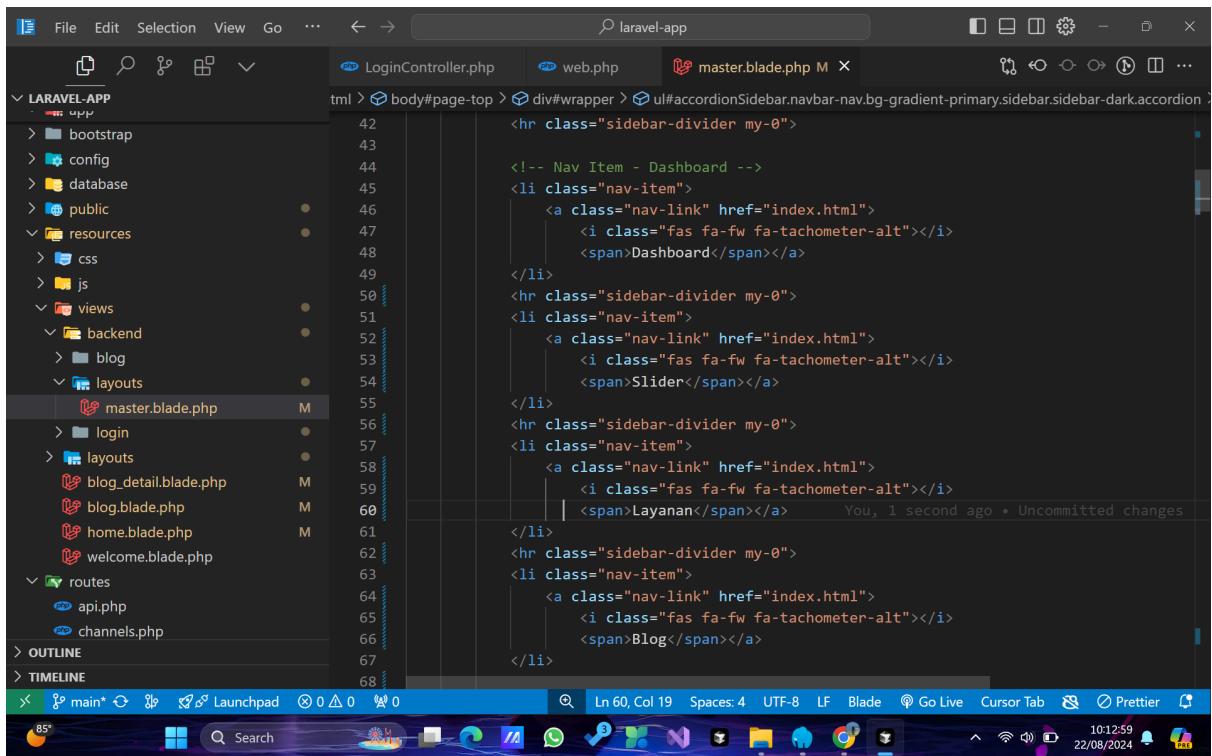

buka file master.blade.php di folder backend/layouts/index.blade.php

di element **ul sidebar** hapus semua li kecuali bagian dashboard seperti ini

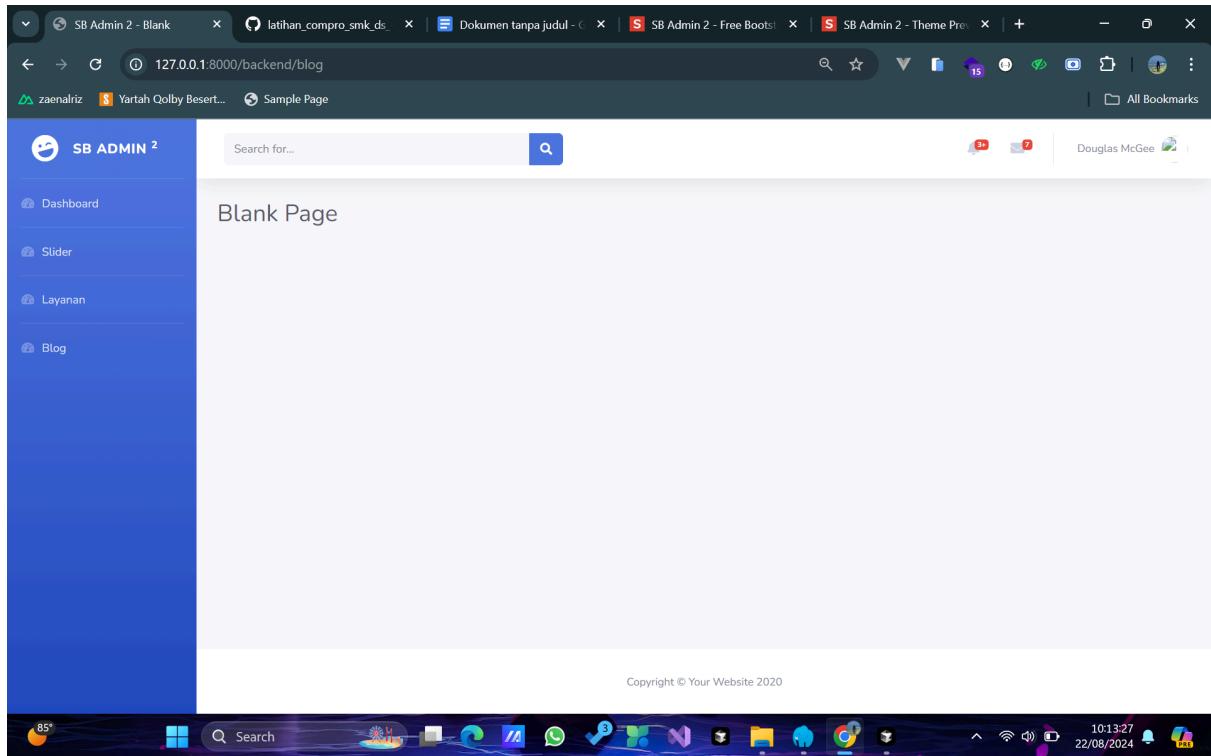

```
25 <body id="page-top">
26
27     <!-- Page Wrapper -->
28     <div id="wrapper">
29
30         <!-- Sidebar -->
31         <ul class="navbar-nav bg-gradient-primary sidebar sidebar-dark accordion" id="accordionSidebar">
32
33             <!-- Sidebar - Brand -->
34             <a class="sidebar-brand d-flex align-items-center justify-content-center" href="#"></a>
35
36             <!-- Divider -->
37             <hr class="sidebar-divider my-0">
38
39             <!-- Nav Item - Dashboard -->
40             <li class="nav-item">
41                 <a class="nav-link" href="#"></i>
42                 <span>Dashboard</span></a>
43             </li>
44
45             <!-- End of Sidebar -->
46             </ul>
47
48         <!-- Content Wrapper -->
49
50
51
52
53
54
55
56
57
58
59
60
61
62
63
64
65
66
67
68
```

lalu buat menu baru seperti ini

```
42     <hr class="sidebar-divider my-0">
43
44     <!-- Nav Item - Dashboard -->
45     <li class="nav-item">
46         <a class="nav-link" href="#"></i>
47         <span>Dashboard</span></a>
48     </li>
49     <hr class="sidebar-divider my-0">
50     <li class="nav-item">
51         <a class="nav-link" href="#"></i>
52         <span>Slider</span></a>
53     </li>
54     <hr class="sidebar-divider my-0">
55     <li class="nav-item">
56         <a class="nav-link" href="#"></i>
57         <span>Layanan</span></a>
58     </li>
59     <hr class="sidebar-divider my-0">
60     <li class="nav-item">
61         <a class="nav-link" href="#"></i>
62         <span>Blog</span></a>
63     </li>
```

hasilnya akan seperti ini

Membuat halaman sliders

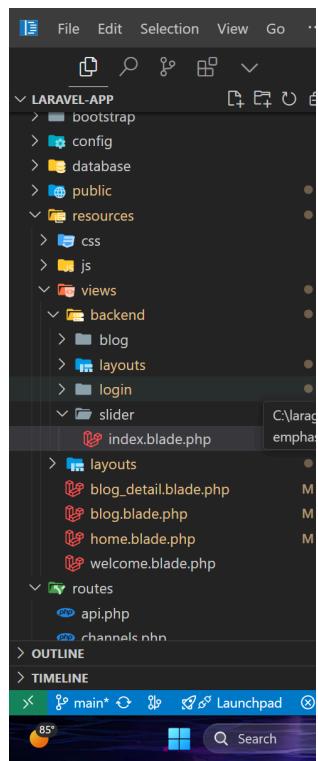

buat controller di dalam folder Controller/Backend dengan nama SliderController,jalankan :
php artisan make:controller Backend/SliderController

lalu buat fungsi untuk halaman slider seperti ini

The screenshot shows the Visual Studio Code interface with the following details:

- File Explorer:** Shows the project structure under "LARAVEL-APP". The "app" folder is expanded, showing "Http", "Controllers", and "Backend". Inside "Backend", "SliderController.php" is selected.
- Code Editor:** Displays the content of "SliderController.php". The code defines a class "SliderController" extending "Controller" and contains a single method "index()".
- Bottom Status Bar:** Shows "Ln 14, Col 1" and other status indicators like "Spaces: 4", "UTF-8", "LF", "PHP", "Go Live", "Cursor Tab", and "Prettier".

setelah itu buat folder slider nya di dalam folder views/backend seperti ini

buka file index di folder slider dan **extends layouts** backendnya seperti ini

The screenshot shows the VS Code interface with the following details:

- File Explorer:** Shows the project structure under "LARAVEL-APP". The "views/backend/slider" folder contains "index.blade.php".
- Editor:** The "index.blade.php" file is open, showing the code:

```
1 @extends('backend.layouts.master')
```
- Status Bar:** Shows "Ln 1, Col 35" and "Source: Laravel Extra Intellisense error". A tooltip for "Laravel Extra Intellisense error" is visible.
- Taskbar:** Shows icons for main*, web.php, SliderController.php, index.blade.php, master.blade.php, and index.blade.php.
- System Tray:** Shows system icons like battery level (85%), date (22/08/2024), and time (10:20:08).

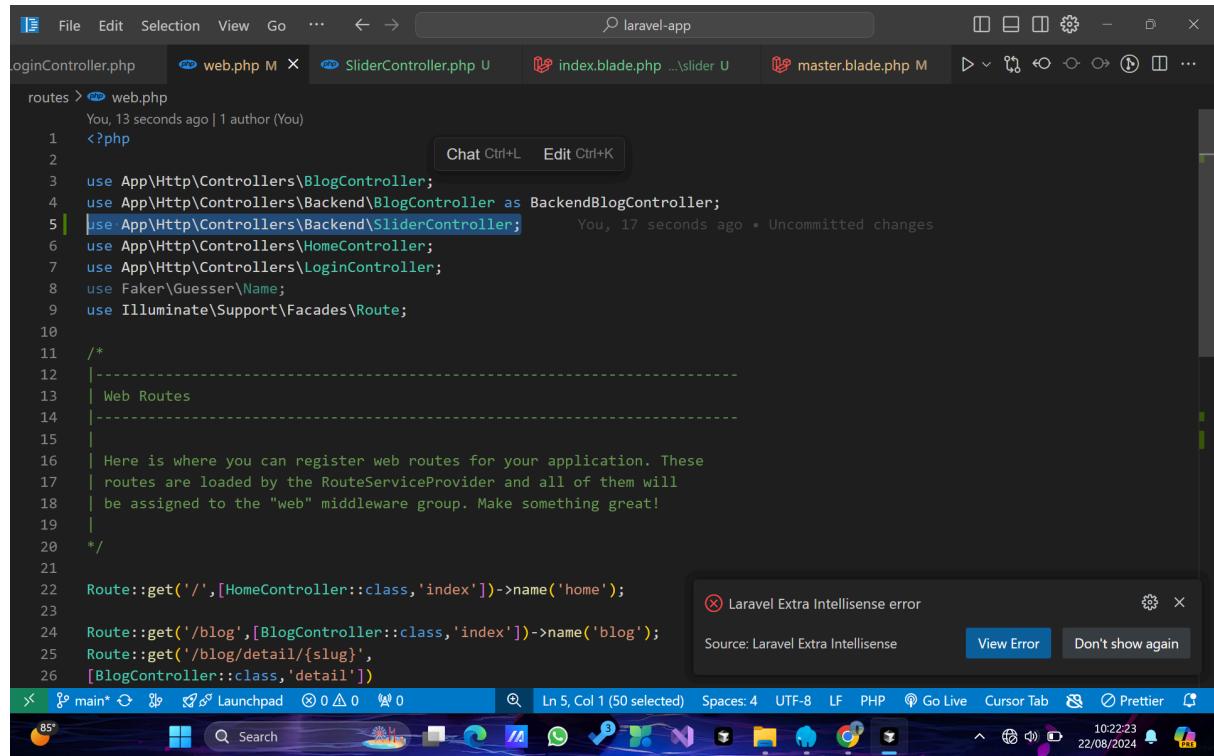

buat route untuk halaman sliders

The screenshot shows the VS Code interface with the following details:

- File Explorer:** Shows the "routes" folder and "web.php" file.
- Editor:** The "web.php" file is open, showing the following routes:

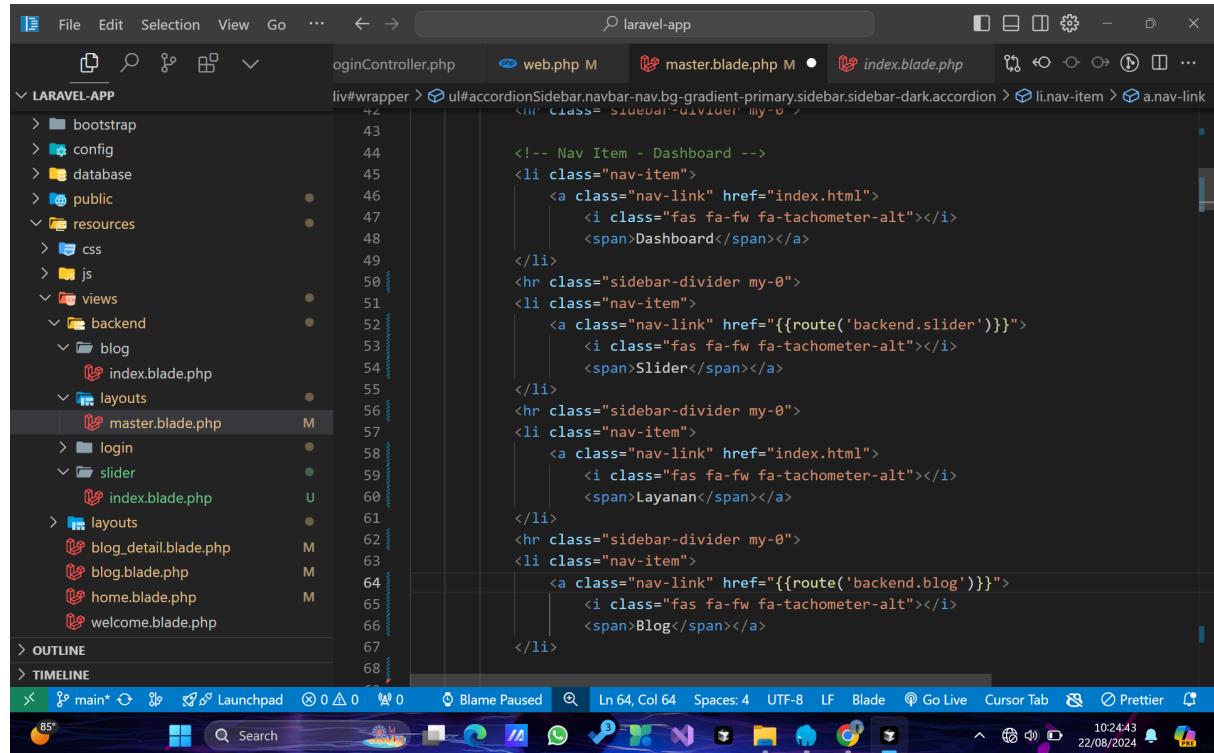

```
20 */
21
22 Route::get('/', [HomeController::class, 'index'])->name('home');
23
24 Route::get('/blog', [BlogController::class, 'index'])->name('blog');
25 Route::get('/blog/detail/{slug}', [BlogController::class, 'detail'])
26     ->name('blog_detail');
27
28
29
30 // backend
31 Route::get('/login', [LoginController::class, 'index'])->name('login');
32
33
34 Route::get('backend/blog', [BackendBlogController::class, 'index'])->name('backend.blog');
35 Route::get('backend/slider', [SliderController::class, 'index'])->name('backend.slider');
```
- Status Bar:** Shows "Ln 36, Col 1" and "Source: Laravel Extra Intellisense error".
- Taskbar:** Shows icons for main*, web.php, SliderController.php, index.blade.php, master.blade.php, and index.blade.php.
- System Tray:** Shows system icons like battery level (85%), date (22/08/2024), and time (10:22:09).

jangan lupa use controller slider nya

```
File Edit Selection View Go ... < > laravel-app
LoginController.php web.php M SliderController.php U index.blade.php ...\\slider U master.blade.php M Chat Ctrl+L Edit Ctrl+K
routes > web.php
You, 13 seconds ago | 1 author (You)
1 <?php
2
3 use App\Http\Controllers\BlogController;
4 use App\Http\Controllers\BackendBlogController as BackendBlogController;
5 use App\Http\Controllers\BackendSliderController; You, 17 seconds ago • Uncommitted changes
6 use App\Http\Controllers\HomeController;
7 use App\Http\Controllers\LoginController;
8 use Faker\Generator\Name;
9 use Illuminate\Support\Facades\Route;
10
11 /*
12 | -----
13 | Web Routes
14 | -----
15 |
16 | Here is where you can register web routes for your application. These
17 | routes are loaded by the RouteServiceProvider and all of them will
18 | be assigned to the "web" middleware group. Make something great!
19 |
20 */
21
22 Route::get('/', [HomeController::class, 'index'])->name('home');
23
24 Route::get('/blog', [BlogController::class, 'index'])->name('blog');
25 Route::get('/blog/detail/{slug}', [BlogController::class, 'detail'])
26
Ln 5, Col 1 (50 selected) Spaces: 4 UTF-8 LF PHP Go Live Cursor Tab Prettier
View Error Don't show again
10:22:23 22/08/2024
```

lalu buka file master di folder backend/layouts. arahkan menu blog dan menu slider ke route blog dan slider yang sudah dibuat seperti ini

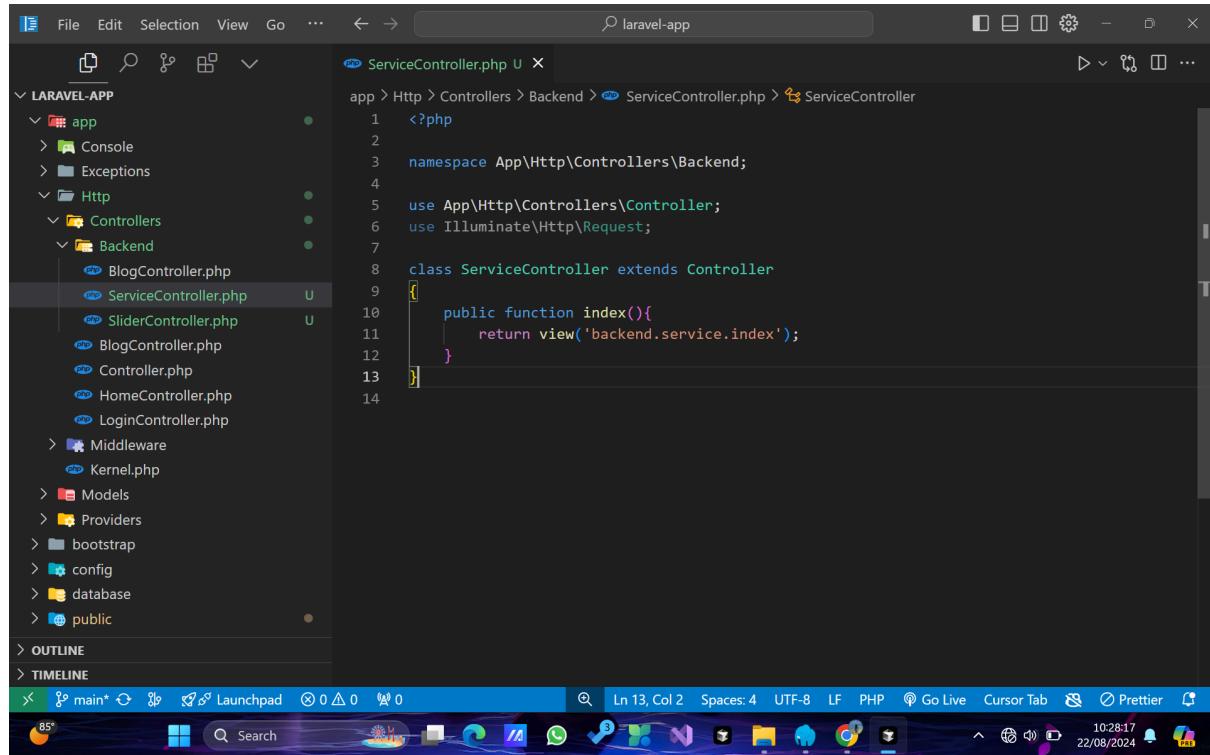

```
File Edit Selection View Go ... < > laravel-app
LoginController.php web.php M master.blade.php M index.blade.php Chat Ctrl+L Edit Ctrl+K
LARAVEL-APP
bootstrap config database public resources views backend blog index.blade.php layouts master.blade.php M slider index.blade.php layouts blog_detail.blade.php M blog.blade.php M home.blade.php M welcome.blade.php
Outline Timeline
Blame Paused Ln 64, Col 64 Spaces: 4 UTF-8 LF Blade Go Live Cursor Tab Prettier
10:24:43 22/08/2024
```

Membuat halaman layanan

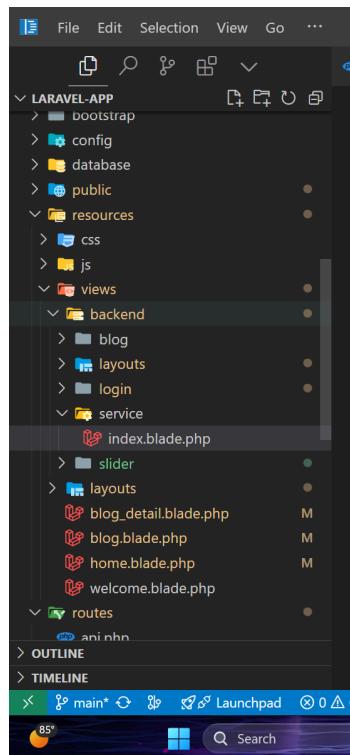

buat controller di dalam folder Controller/Backend dengan nama ServiceController,jalankan :
php artisan make:controller Backend/ServiceController

lalu buat fungsi untuk halaman layanan seperti ini

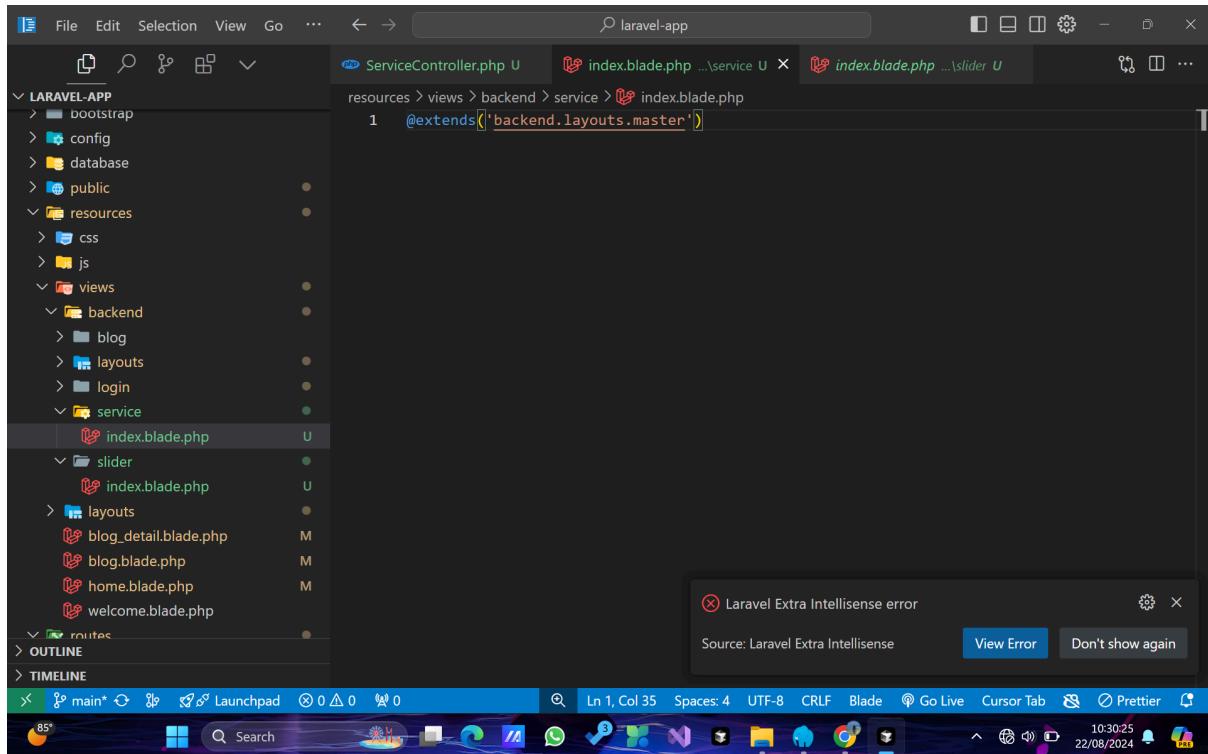

```
<?php  
namespace App\Http\Controllers\Backend;  
use App\Http\Controllers\Controller;  
use Illuminate\Http\Request;  
  
class ServiceController extends Controller  
{  
    public function index()  
    {  
        return view('backend.service.index');  
    }  
}
```

setelah itu buat folder service nya di dalam folder views/backend seperti ini

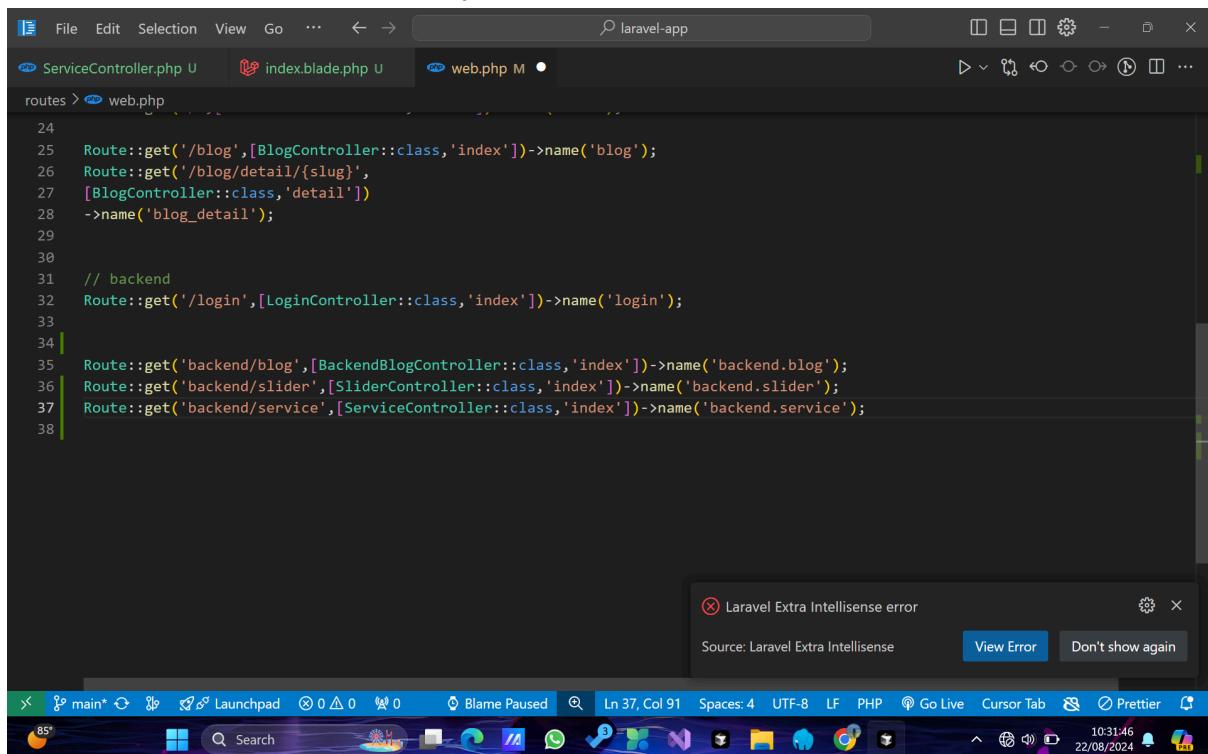

buka file index di folder service dan **extends layouts** backendnya seperti ini

```
resources > views > backend > service > index.blade.php
1   @extends('backend.layouts.master')
```

Laravel Extra Intellisense error
Source: Laravel Extra Intellisense
View Error Don't show again

buat route untuk halaman service nya

```
Route::get('/blog',[BlogController::class,'index'])->name('blog');
Route::get('/blog/detail/{slug}',[BlogController::class,'detail'])
->name('blog_detail');

// backend
Route::get('/login',[LoginController::class,'index'])->name('login');

Route::get('backend/blog',[BackendBlogController::class,'index'])->name('backend.blog');
Route::get('backend/slider',[SliderController::class,'index'])->name('backend.slider');
Route::get('backend/service',[ServiceController::class,'index'])->name('backend.service');
```

Laravel Extra Intellisense error
Source: Laravel Extra Intellisense
View Error Don't show again

jalan lupa use controller nya

lalu buka file master di folder backend/layouts.arahkan menu lservice ke route service yang sudah di buat seperti ini

```

blade.php > html > body#page-top > div#wrapper > ul#accordionSidebar.navbar-nav.bg-gradient-primary.sidebar.sidebar-dark.accordion > li.nav-item > a.nav-link
43
44     <!-- Nav Item - Dashboard -->
45     <li class="nav-item">
46         <a class="nav-link" href="index.html">
47             <i class="fas fa-fw fa-tachometer-alt"></i>
48             <span>Dashboard</span></a>
49     </li>
50     <hr class="sidebar-divider my-0">
51     <li class="nav-item">
52         <a class="nav-link" href="{{route('backend.slider')}}">
53             <i class="fas fa-fw fa-tachometer-alt"></i>
54             <span>Slider</span></a>
55     </li>
56     <hr class="sidebar-divider my-0">
57     <li class="nav-item">
58         <a class="nav-link" href="{{route('backend.service')}}"> You, now * Uncommitted changes
59             <i class="fas fa-fw fa-tachometer-alt"></i>
60             <span>Layanan</span></a>
61     </li>
62     <hr class="sidebar-divider my-0">
63     <li class="nav-item">
64         <a class="nav-link" href="{{route('backend.blog')}}">
65             <i class="fas fa-fw fa-tachometer-alt"></i>
66             <span>Blog</span></a>
67     </li>
68
69

```

Menambahkan yield untuk konten backend

buka file master.blade.php di folder backend/layouts.cari element

```
<h1 class="h3 mb-4 text-gray-800">Blank Page</h1>
```

ganti element di atas menjadi **yield** seperti ini

```

File Edit Selection View Go ... < > laravel-app
master.blade.php M
html > body#page-top > div#wrapper > div#content-wrapper.d-flex.flex-column > div#content > div.container-fluid
275
276
277
278
279
280
281
282
283
284
285
286
287
288
289
290
291

```

lalu setiap file index di folder blog,service,slider tambahkan **section('content')** seperti ini

The screenshot shows a code editor interface for a Laravel application named 'laravel-app'. The left sidebar displays the project structure:

- LARAVEL-APP
 - config
 - database
 - public
 - resources
 - css
 - js
 - views
 - backend
 - blog
 - index.blade.php
 - layouts
 - master.blade.php
 - login
 - service
 - index.blade.php
 - slider
 - index.blade.php
 - layouts
 - master.blade.php
 - blog_detail.blade.php
 - blog.blade.php
- OUTLINE
- TIMELINE

The right pane shows two tabs: 'master.blade.php M' and 'index.blade.php M'. The 'index.blade.php' tab contains the following code:

```
resources > views > backend > blog > index.blade.php
You, 8 seconds ago | 1 author (You)
1 @extends('backend.layouts.master')
2
3 @section('content')
4   blog
5 @endsection
```

A tooltip 'Laravel Extra Intellisense error' is displayed at the bottom right of the editor.
